Answer ALL Questions

(10 X 10 = 100 Marks)

1.	Evaluate how ethical business management contributes to the long-term success of software companies. With reference to Infosys or any other IT firm, analyse how Corporate Social Responsibility (CSR) initiatives support sustainable business growth, stakeholder trust, and corporate reputation. Provide relevant examples to justify your analysis.	CO1	BL5
2.	Airlines operating international routes often face geopolitical uncertainties such as conflicts and airspace restrictions. During periods of conflict in the Middle East, airline companies must decide whether to introduce, modify, or suspend certain routes while considering safety, cost, and demand. Critically analyse how airlines make strategic decisions under risk in such situations. Discuss the key factors involved in evaluating risks, possible alternatives, and the role of managerial judgment in making effective decisions.	CO2	BL4
3.	A multinational IT company managing global software development projects has teams working from India, Europe, and the United States. The company is considering adopting either a matrix organizational structure or a virtual organizational structure to improve project coordination and efficiency. Analyze which structure would be more effective for managing such global IT projects and justify your answer with relevant factors such as communication, flexibility, and decision-making.	CO3	BL4
4.	A renewable energy company in Tamil Nadu is recruiting young engineers to work in solar and wind energy projects. As an HR manager, design a practical career development strategy that will help these engineers build technical skills, gain field experience, and progress into leadership roles within the organization. Explain the key steps involved in training, performance appraisal, and long-term career planning.	CO4	BL6

5.	In a large multinational company, employees from different cultural backgrounds work together on projects using both in-person and digital communication tools. However, misunderstandings and delays frequently occur due to ineffective communication. Analyze the key barriers to effective communication in this corporate environment and propose practical strategies that managers can implement to improve communication and collaboration.	CO5	BL3
6.	Discuss different methods used to control organizational performance such as profit and loss control, return on investment (ROI), and balanced scorecard. How do these techniques help managers evaluate overall performance?	CO5	BL5
7.	Analyse the role Analyze how Artificial Intelligence (AI) is transforming e-commerce business models in India. With reference to Flipkart or Amazon India, examine how AI applications such as recommendation systems, demand forecasting, customer service chatbots, and logistics optimization improve customer experience and operational efficiency	CO5	BL4
8.	A mid-sized software development company is facing high employee turnover. Exit interviews reveal that employees feel their roles are unclear and career growth opportunities are limited. The HR department plans to redesign the staffing process and performance appraisal system. Apply the concepts of job design and job description to improve role clarity in the organization. Suggest appropriate selection techniques that could help recruit better candidates.	CO3	BL3
9.a)	A project team in an engineering company is missing deadlines and experiencing conflicts among team members. Employees report that the project manager follows a strict authoritarian leadership style, and communication between team members is limited. Analyse how the current leadership style is affecting team motivation and performance. Discuss how different motivation theories and leadership styles could improve team productivity.	CO4	BL3
	OR		
9.b)	A traditional retail company is planning to transform its business by adopting online business models, e-commerce platforms, and digital technologies. The company also plans to use social media marketing and AI-based customer analytics. a) Analyze how digital technologies can transform business management practices. b) Explain the challenges faced by organizations adopting modern management practices.	CO4	BL3

10.a) A rapidly expanding IT services company has offices in India, the USA, and Europe. The company currently follows a functional organizational structure where departments such as development, testing, and marketing operate independently. However, project delays and coordination issues have increased as the company grows. **CO5** **BL4**

Management is considering shifting to either a matrix organization or establishing Strategic Business Units (SBUs) to improve project management and global coordination.

a) Analyze the limitations of the current functional structure in managing global projects.

b) Compare matrix organization and SBU structures in terms of flexibility and coordination.

OR

10.b) A well-established manufacturing organization has recently introduced new digital technologies and automation systems. However, many employees are resisting the change because they fear job loss and lack the skills to operate new systems. Conflicts have started emerging between management and employees. **CO5** **BL4**

The company wants to create a learning organization and manage the change effectively.

a) Apply suitable conflict management techniques to address employee concerns.

b) Explain how training and development programs can help employees adapt to technological change.
